Journal of Marine Research

VOLUME 29, NUMBERS 1–3

Founded by Albert Eide Parr in 1937 and published
by the Sears Foundation for Marine Research

Yale University

Issued 1971, New Haven, Conn., U.S.A.

EDITOR

YNGVE H. OLSEN
Room 129, OML, Yale
New Haven, Conn. 06520

ADVISORY COMMITTEE

VAUGHAN T. BOWEN
Woods Hole Oceanographic Institution

DANIEL MERRIMAN, Director
Sears Foundation for Marine Research
Yale University

R. B. MONTGOMERY
The Johns Hopkins University

ALLAN R. ROBINSON
Harvard University

BOARD OF EDITORS

ROBERT S. ARTHUR
Scripps Institution of Oceanography

RICHARD A. BARKLEY
National Maritime Fisheries Service

VAUGHAN T. BOWEN
Woods Hole Oceanographic Institution

JAMES H. CARPENTER
Chesapeake Bay Institute

CHARLES L. DRAKE
Dartmouth College

E. D. GOLDBERG
Scripps Institution of Oceanography

GORDON W. GROVES
University of Hawaii

WILLARD D. HARTMAN
Yale University

CEDRIC R. MANN
Bedford Institute of Oceanography

R. B. MONTGOMERY
The Johns Hopkins University

HANS A. PANOFSKY
Pennsylvania State University

ROBERT G. PAQUETTE
Naval Postgraduate School

M. N. A. PETERSON
Scripps Institution of Oceanography

GEORGE W. PLATZMAN
University of Chicago

MAURICE RATTRAY, JR.
University of Washington

ROBERT O. REID
Texas A & M University

WILLIAM S. RICHARDSON
Nova University

ALLAN R. ROBINSON
Harvard University

OSCAR E. SETTE
Ocean Ecology Unit, NOAA

RUSSELL L. SNYDER
Nova University

ROBERT W. STEWART
University of British Columbia

TJ. H. VAN ANDEL
Oregon State University

GEORGE VERONIS
Yale University

WARREN S. WOOSTER
Scripps Institution of Oceanography

CHARLES S. YENTSCH
University of Massachusetts

ALPHABETICAL INDEX BY AUTHORS' NAMES

L. P. Atkinson: See Stefánsson and Atkinson.

A. N. Barrett: See Shonting and Barrett.

G. A. Berberian: See Chew, Richardson, and Berberian.

V. T. Bowen, K. M. Wong, and V. E. Noshkin: Plutonium-239 in and over the Atlantic Ocean. 1.

J. L. Buscaglia: On the circulation of the Intermediate Water in the southwestern Atlantic Ocean. 245.

G. A. Cannon and D. W. Pritchard: A biaxial propeller current-meter system for fixed-mount applications. 181.

J. H. Carpenter: See Loftus and Carpenter.

Frank Chew, W. S. Richardson, G. A. Berberian: A comparison of direct and electric-current measurements in the Florida Current. 339.

D. J. Clarke: Seiche motions for a basin of rectangular plan and of nonuniform depth. 47.

J. C. Daley: See Valenzuela, Laing, and Daley.

W. D. Forrester: Distribution of suspended oil particles following the grounding of the tanker ARROW. 151.

J. S. Godfrey and A. R. Robinson: The East Australian Current as a free inertial jet. 256.

David Halpern: Observations on short-period internal waves in Massachusetts Bay. 116.

Linda G. Halversen: See Jennings and Halverson.

J. B. Jennings and Linda G. Halverson: Variations in subcuticular acid phosphatase activity during the molting cycle of the euphausiid crustacean, *Thysanoessa raschii* (M. Sars) Hansen. 133.

J. A. Johnson: On the wind-driven circulation of a stratified ocean. 197.

S. L. Kupferman: Cesium-137 in the North Atlantic measured by selective absorption in situ. 11.

M. B. Laing: See Valenzuela, Laing, and Daley.

N. P. Laird: Panama Basin Deep Water—Properties and circulation. 226.

J. C. Larsen: The electromagnetic field of long and intermediate water waves. 28.

M. E. Loftus and J. H. Carpenter: A fluorometric method for determining chlorophylls a, b, and c. 319.

R. J. Lynn: On potential density in the deep South Atlantic Ocean. 171.

H. O. Mofjeld and Maurice Rattray, Jr.: Free oscillations in a beta-plane ocean. 281.

V. E. Noshkin: See Bowen, Wong, and Noshkin.

T. T. Packard: The measurement of respiratory electron-transport activity in marine phytoplankton. 235.

D. F. Paskausky: Numerically predicted changes in the circulation of the Gulf of Mexico accompanying a simulated hurricane passage. 214.
D. W. Pritchard: See Cannon and Pritchard.
Maurice Rattray, Jr.: See Mofjeld and Rattray, Jr.
W. S. Richardson: See Chew, Richardson, and Berberian.
A. R. Robinson: See Godfrey and Robinson.
T. B. Sanford and W. J. Schmitz, Jr.: A comparison of direct measurements and G.E.K. observations in the Florida Current off Miami. 347.
W. J. Schmitz, Jr.: See Sanford and Schmitz, Jr.
Friedrich Schott: Spatial structure of inertial-period motions in a two-layered sea, based on observations. 85.
R. C. Seitz: Measurement of a three-dimensional field of water velocities at a depth of one meter in an estuary. 140.
D. H. Shonting and A. H. Barrett: A stable spar-buoy platform for mounting instrumentation. 191.
Unnsteinn Stefánsson and L. P. Atkinson: Relationship of potential temperature and silicate in the deep waters between Cape Lookout, North Carolina, and Bermuda. 306.
M. R. Stevenson and B. A. Taft: New evidence of the Equatorial Undercurrent east of the Galapagos Islands. 103.
B. A. Taft: See Stevenson and Taft.
H. C. S. Thom: Asymptotic extreme-value distributions of wave heights in the open ocean. 19.
G. R. Valenzuela, M. B. Laing, and J. C. Daley: Ocean spectra for the high-frequency waves as determined from airborne radar measurements. 69.
Pierre Welander: Some exact solutions to the equations describing an ideal-fluid thermocline. 60.
K. M. Wong: See Bowen, Wong, and Noshkin.

This Journal is normally issued in three numbers per volume per year constituting one volume. Volumes 1–18 have been published on an irregular schedule, but with Volume 19 a regular schedule has been followed. Beginning with Volume 21, the issues are appearing on 15 January, 15 May, and 15 September. All income derived from subscriptions is used solely to increase the volume and improve the quality of the Journal for the benefit of its readers. All communications should be addressed to the Editor.

All back issues are available at the following prices: Vols. 1–12, $ 3.00 per volume or $ 1.50 per number; vols. 13–16, $ 5.00 per volume or $ 2.00 per number; vols. 17–20, $ 7.00 per volume or $ 2.50 per number. Beginning with volume 21 (1963), the price is $ 15.00 per volume or $ 5.00 per number for institutions, libraries, and agents, and $ 10.00 per volume or $ 3.50 per number for individual subscribers.
